

# Cardiology Science Lunch Berlin

a weekly exchange of insights and ideas in cardiovascular medicine

## Cardiac CT: There are More Questions Than Answers?

**Prof. Dr. med. Marc Dewey**  
**Department of Radiology, Charité Campus Mitte**

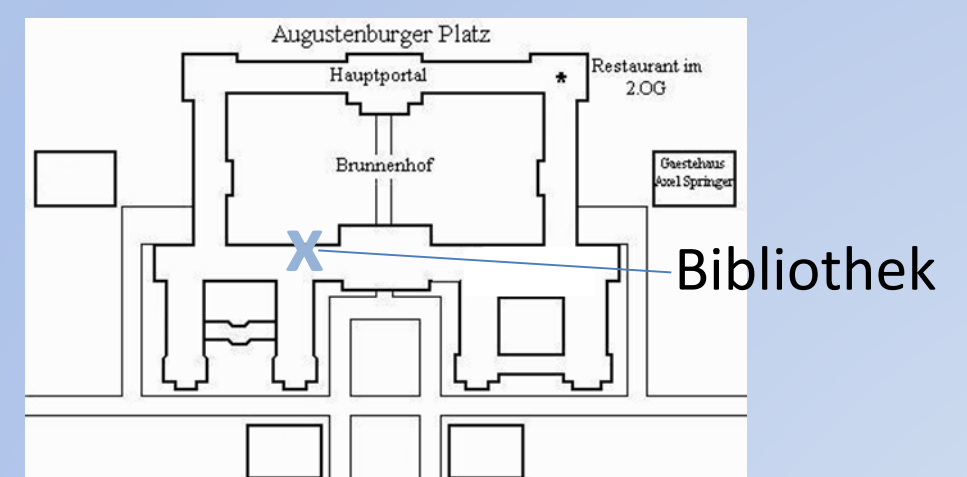

Increasing evidence supports the use of cardiac computed tomography (CT) in selected patient populations with suspected or known coronary artery disease. Professor Dewey is a radiologist and has pioneered cardiac CT for comprehensive assessment of coronary artery disease. This includes direct visualization of the presence of obstructive coronary artery disease, detection of high-risk plaques features and evaluation of myocardial perfusion. In a current European multicenter study, Professor Dewey's team investigates the broad applicability and effectiveness of cardiac CT in 25 centers.

**Wednesday, 12.04.2017**

**12:00 – 13:00h**

**Bibliothek at DHZB**

Augustenburger Platz 1, Berlin

### The Cardiology Science Lunch Team

from the Department of Cardiology, Charité Universitätsmedizin, Campus Virchow-Klinikum, Berlin  
and the Department of Medicine/Cardiology, Deutsches Herzzentrum Berlin

Prof. Dr. med. Frank R. Heinzel, Ph.D.  
Dr. med. Tobias Trippel

Dr. Paulina Wakuła, Ph.D.  
Christina Gaulhofer, BSc. MSc.  
Prof. Dr. med. Philipp Stawowy

Univ. Prof. Dr. med. Burkert Pieske

The following CSLB  
is on **26.04.2017**
