

Cardiology Science Lunch Berlin

a weekly exchange of insights and ideas in cardiovascular medicine

Sex and Gender in Cardiovascular Diseases

Prof. Dr. Dr. h.c Vera Regitz-Zagrosek
Institute for Gender in Medicine
Center for Cardiovascular Research, Charité

Women and men differ in atherosclerosis development, in coronary pathophysiology, in the cardiovascular response to pressure overload and exercise and many others. To understand sex specific mechanisms, animal and cell culture models of ischemic, hemodynamic and neurohormonal stress as well as modified sex hormone receptor expression are used. Gender differences arise from different life situations in women and men.

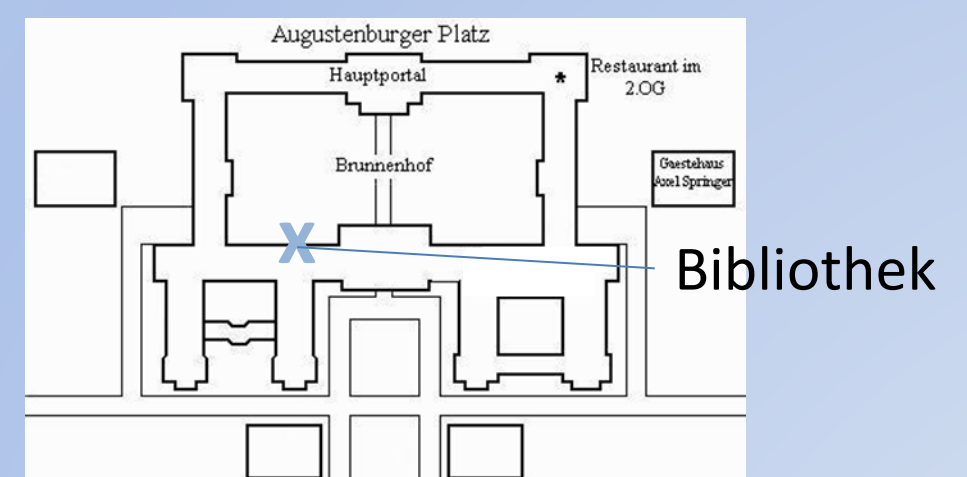

Prof. Vera Regitz-Zagrosek is the founder of the Institute for Gender in Medicine at Charité and an internationally recognized leader in the field of sex and gender sensitive biomedical research.

Wednesday, 15.6.2016

12:00 – 13:00h

Bibliothek at DHZB

Augustenburger Platz 1, Berlin
